Introduction

Behavioral research suggests that the most effective people are those who understand their strengths and weaknesses, because they can best develop strategies to meet the demands of their environment.

A person's behavior is a necessary and integral part of who they are. In other words, much of our behavior comes from "nature" (inherent), and much comes from "nurture" (our upbringing). It is the universal language of "how we act," or our observable human behavior.

In this report we are measuring four dimensions of normal behavior. They are:

- How you respond to problems and challenges.
- How you influence others to your point of view.
- How you respond to the pace of the environment.
- How you respond to rules and procedures set by others.

This report analyzes behavioral style; that is, a person's manner of doing things. Is the report 100% true? Yes, no, and maybe. We are only measuring behavior. We only report statements which are true and areas of behavior in which tendencies are shown. Feel free to delete any statement from the report that may not apply, but only after checking with friends or colleagues to see if they agree.

All people exhibit all four behavioral factors to varying degrees of intensity.

—W.M. Marston

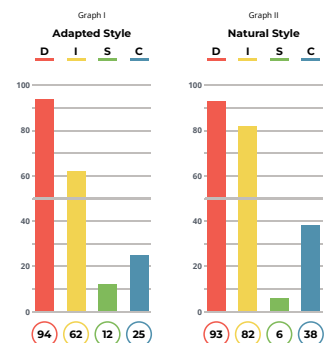

Basic Characteristics

Based on Samantha's responses, the report has generated general behavioral statements to provide information on her natural behavior. That is, if left on her own, HOW SHE WOULD CHOOSE TO DO THE JOB. Use this information to gain a better understanding of Samantha's natural behavior.

Samantha embraces visions not always seen by others. Samantha's creative mind allows her to see the "big picture." She is goal-oriented and driven by results. She is the team member who will try to keep the others on task. Most people see her as a high risk-taker. Her view is, "nothing ventured, nothing gained." She prefers an environment with variety and change. She is at her best when many projects are underway at once. Samantha is extremely results-oriented, feeling a sense of urgency to complete projects quickly. She is deadline conscious and becomes irritated if deadlines are delayed or missed. Many people see her as a self-starter dedicated to achieving results. She needs to learn to relax and pace herself. She may expend too much energy trying to control herself and others. Samantha seeks her own solutions to problems. In this way, her independent nature comes into play. She is a goal-oriented individual who believes in harnessing people to achieve goals. She needs people with other strengths on her team.

Samantha will work long hours until a tough problem is solved. After it is solved, Samantha may become bored with any routine work that follows. She likes to make decisions quickly. She is a good problem solver and troubleshooter, always seeking new ways to solve old problems. She prefers authority equal to her responsibility. Samantha is decisive and prefers to work for a decisive manager. She can experience stress if her manager does not possess similar traits. She should realize that at times she needs to think a project through, beginning to end, before starting the project. Sometimes she may be so opinionated about a particular problem that she has difficulty letting others participate in the process.

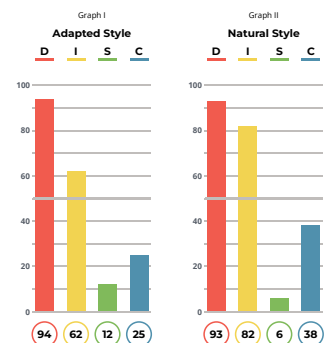

Basic Characteristics

Continued

Samantha tends to be intolerant of people who seem ambiguous or think too slowly. She challenges people who volunteer their opinions. Her creative and active mind may hinder her ability to communicate to others effectively. She may present the information in a form that cannot be easily understood by some people. She may sometimes mask her feelings in friendly terms. If pressured, Samantha's true feelings may emerge. Samantha may lack the patience to listen and communicate with slower acting people. She should exhibit more patience and ask questions to make sure that others have understood what she has said. She may lose interest in what others are saying if they ramble and fail to speak to the point. Her active mind is already moving ahead.

The TTI Success Insights® Wheel

The TTI Success Insights® Wheel is a powerful tool first popularized in Europe. In addition to the text you have received about your behavioral style, the Wheel adds a visual representation that allows you to:

- View your natural behavioral style (circle).
- View your adapted behavioral style (star).
- Note the degree to which you are adapting your behavior.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behavior. The further the two plotting points are from each other, the more you are adapting your behavior.

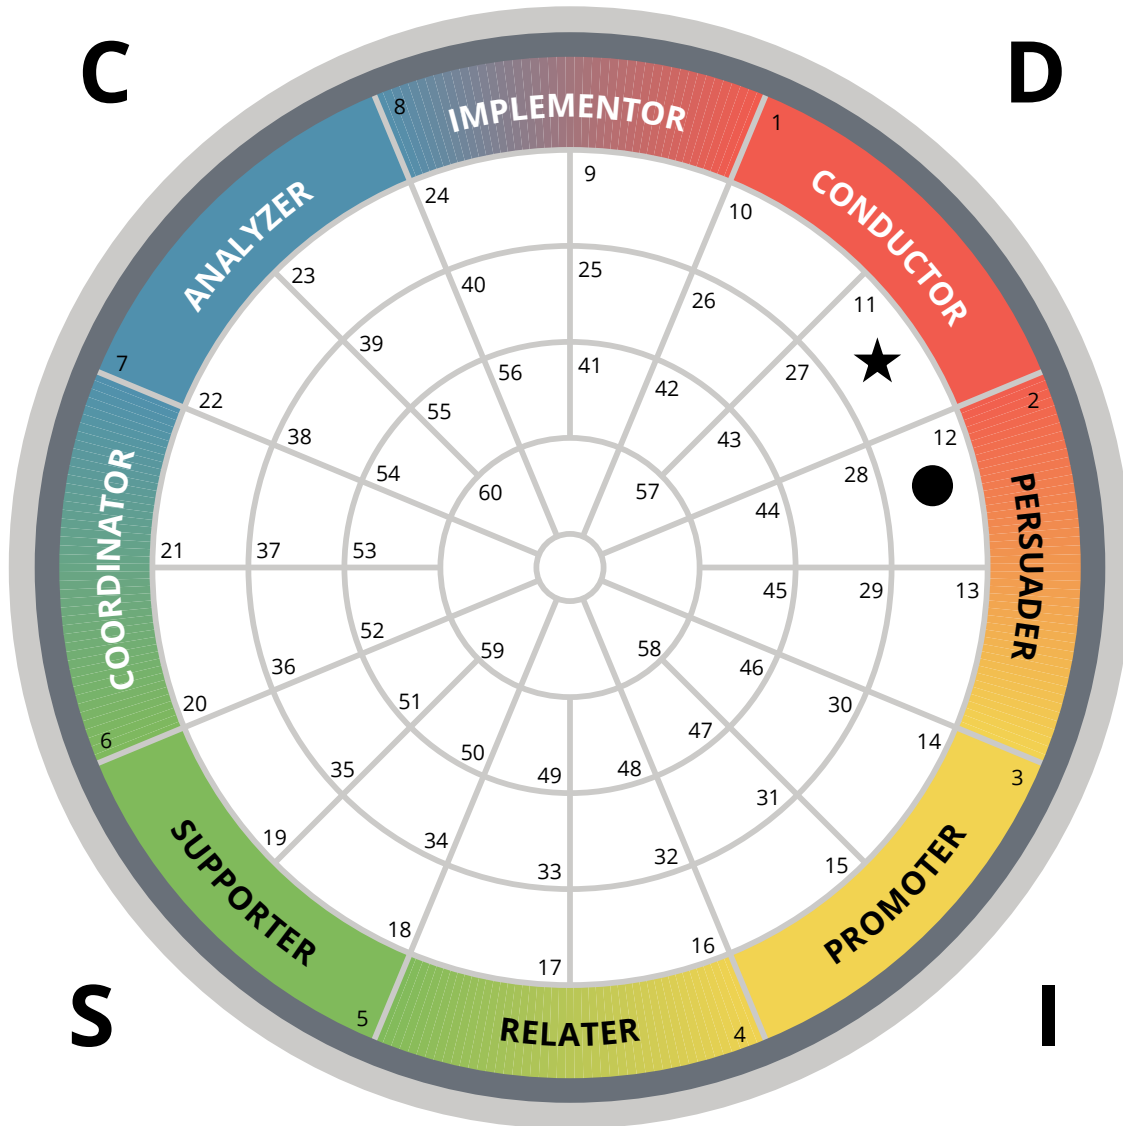

If you are part of a group or team who also took the behavioral assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding, and appreciation can be increased.
